

International Trade

Department: Fudan International Summer Session

Course Code	ECON170006		
Course Title	International Trade		
Credit	2	Credit Hours	36+3 tutorial hours (one credit hour is 45 minutes)
Course Nature	<input type="checkbox"/> Specific General Education Courses <input type="checkbox"/> Core Courses <input checked="" type="checkbox"/> General Education Elective Courses <input type="checkbox"/> Basic Courses in General Discipline <input type="checkbox"/> Professional Compulsory Courses <input type="checkbox"/> Professional Elective Courses <input type="checkbox"/> Others		
Course Objectives	<p>After you finish the course, you are supposed to</p> <ul style="list-style-type: none"> ▪ Understand different sources of gains from trade and therefore different types of international trade theories. ▪ Understand different trade policies and their corresponding welfare effects. ▪ Match the international trade theories to real-life international trade data and trade policies. ▪ Be able to generate an import and export industry report from the data digging to deeper theoretical and empirical analyses. 		
Course Description	<p>The purpose of this course is to help students understand the basics of international trade and the effects of various international economic policies on domestic and world welfare, with an empirical focus on China trade and foreign direct investment. The course will highlight sources of comparative advantage, gains and losses from trade, the impact of trade on economic growth, and effects of trade policy interventions such as tariffs, quotas, voluntary export restraints, and export subsidies. In doing so, it will emphasize both theoretical (analytical) models as well as empirical studies of how well those models fit "real world" data. Moreover, the course will frequently compare and contrast alternative theories/conceptions of the nature of international trade and the gains or losses thereof. Understanding the economic intuitions behind the technically demanding models as well as thinking critically about the assumptions behind the theories and how well they fit actual trading economies will be a major focus. I will try to strike a balance between the "extensive" and the "intensive" margins of the course materials: the extensive margin refers to an overview of various topics in the field of international trade, while the intensive</p>		

	margin means technical training and empirical real-life cases in China on selected topics.			
Course Requirements:				
Microeconomics				
Teaching Methods:				
Lectures, guest speech, in-class assignments and group project				
Instructor's Academic Background:				
<p>Dr. Yiqing Xie is an assistant research professor at Shanghai Academy of Social Sciences. She received her PhD in Economics from the University of Colorado at Boulder in 2012. She has been teaching Economics including microeconomics, macroeconomics and international economics since 2008 at the University of Colorado at Boulder, the University of North Dakota and Fudan University. Her research interest is international economics and foreign direct investment.</p> <p>Email: yiqingxie@gmail.com</p>				
Course Schedule (Tentative):				
Arrangement	Contents	Text/reference	Homework	Outcome
Day 1	Overview of the World Economy	Feenstra and Taylor, Chapter 1		Know the basics of international trade.
Day 2	Ricardian Model	Feenstra and Taylor, Chapter 2	In-class assignment 1	Understand the first source of comparative advantage: technology.
Day 3	Heckscher-Ohlin Model	Feenstra and Taylor, Chapter 4	In-class assignment 2	Understand the second source of comparative advantage: endowments.
Day 4	The Specific Factor Model	Feenstra and Taylor, Chapter 3	In-class assignment 3	Understand the combination of technology and endowments as a source of comparative advantage.

Day 5	Trade in Factors of Production and Trade in Goods	Feenstra and Taylor, Chapter 5	In-class assignment 4	Understand the substitutability/complementarity between trade in factors of production and trade in goods.
Day 6	Increasing Returns to Scale and Trade	Feenstra and Taylor, Chapter 6	In-class assignment 5	Understand the third source of comparative advantage: IRS.
Day 7	Trade Protection Policies	Feenstra and Taylor, Chapter 8, 9	In-class assignment 6	Know different trade protection policies and their pros and cons.
Day 8	Strategic Trade Policy	Feenstra and Taylor, Chapter 10	In-class assignment 7	Understand the mechanism of strategic trade policies from oligopolistic competition.
Day 9	Foreign Direct Investment	Feenstra and Taylor, Chapter 7	In-class assignment 8	Understand the importance of FDI in the global economy.
Day 10	Final Exam			Closed book!
Day 11	Guest Speaker Presentation or Field Trip			To be determined.
Day 12	Group Project Presentation			Import/Export Industry Analysis

The design of class discussion or exercise, practice, experience and so on:

In-class assignments * 8 + group project * 1 + final exam (closed book)

Grading & Evaluation:

Students are required to attend class, participate in class and finish all in-class assignments, which accounts for about 20% of the final grade. The rest 80% is based on one group project (import/export industry analysis), 20%, and 60% for the final exam.

In-class Assignments -- 20%: due in class

Project: Industry Trade Analysis -- 20%: group work, due last week of class

Final Exam -- 60%: Time and place to be determined, closed book

There will be no make-up exam.
